<b>Office Action Summary</b>	<b>Application No.</b> 10/053,883	<b>Applicant(s)</b> PEDERSEN, MORTEN LORENTZ	
	<b>Examiner</b> Kenneth R Horlick	<b>Art Unit</b> 1637	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1637

**1. Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-85 and 94-105, drawn to methods of obtaining a single-stranded polynucleotide tag from a sample, classified in class 435, subclass 6.
- II. Claim 86, drawn to a first kit, classified in class 435, subclass 810.
- III. Claims 87-90, drawn to a second kit, classified in class 435, subclass 810.
- IV. Claims 91-93, drawn to a solid support, classified in class 422, subclass 104.

The inventions are distinct, each from the other because of the following reasons:

A) Inventions II-IV and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with other materially different products, such as the distinct kits and solid support of Groups II-IV.

B) Inventions (II,III) and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use

Art Unit: 1637

together and have different functions; that is, the solid support of Group IV is not part of the kit of either Group II or III.

C) Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different functions; that is, the kits of Groups II and III comprise distinct sets of reagents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or because the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Iver Cooper on 03/08/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
